400		
410	Save Command	Used To Dump All Configuration Information To A Text File For Reuse. The Last Two Iterations May Be Kept Actively, With Older Versions Retained As Archives.
420	Checkpoint Command	Causes All Objects To Be Written To Log For Immediate Recovery If Corrupted. For All Running Queue Managers That Use Linear Logging
430	Clean Log Command	The Clean Log Script Looks In The Error Logs For The Latest Transaction Logs That Are Needed For Full Recovery. The Clean Log Script Will Then Take Older Logs And Zip Them Up To Conserve Space. Used For All Running Queue Managers Using Linear Logging
440	Prune Command	Provided To Prune Old Compressed Logs From Clean Logs That Are No Longer Needed. The Prune Command Keeps Linear Logging Queue Managers From Taking Over The Filesystem And Filling It Up. The Prune Utility Provides Administrators With The Ability To Roll Back To An Earlier Point In Time, But Also Keeps File Systems Free Of Obsolete Files.
450	Save Authorizations Command	Provides Recovery Of Authorizations In Case A Queue Manager Needs To Be Rebuilt; Or If Moved To Another Box.
460	Archive Old Save Files Command	Provides Logs Beyond The Standard Two Save Files For Each Queue Manager. The Archive Old Save Files Command Takes Old Save Files Periodically, And Copy Them To An Archive Directory.
